

Intentional administration of substances:

written by Dennis_ Rombaut_ | March 28, 2022

This means that substances (medicines, liquids, products, ...) that can cause death or serious damage to health are administered to a person without the intention of killing that person. This is very similar to poisoning, but with poisoning there is an intention to kill. Poisoning is therefore equivalent to murder.

For more information about this crime, a concrete punishment and/or tailor-made advice, please contact our criminal lawyers at info@studio-penale.be.
